# Laboratory

The well-equipped and professionally staffed clinical laboratory is under the direction of pathologists who are board-certified in Clinical, Anatomical and Dermato-Pathology. The laboratory tests blood, tissues and other body fluids when requested by the physician.

If your physician orders blood tests for you during your hospital stay, you will be visited by a phlebotomist, a professional specially trained in drawing blood. When your physician requests laboratory tests for you, you will receive a bill for use of hospital equipment and necessary supplies. In addition, the pathologist will bill you separately for professional services.
