Medical / Surgical Unit

Advances in technology have changed what it means to have surgery. Now, many procedures are performed quicker, with smaller incisions, little or no pain, and faster recovery.

Our three surgery suites are spacious, efficient, and well equipped to handle a variety of surgical services, such as orthopedic procedures, vascular, thoracic, urological, gynecological and general surgery.

After surgery, patients are usually taken to a recovery room for monitoring and careful observation until they are ready to return to their rooms.

Our surgeons use some of the most modern technology available including laser and endoscopic surgery equipment. Our surgery staff is highly trained and experienced and will make sure you are comfortable during your stay.
