Pediatrics

Nothing is harder on a parent than when their child is injured or sick. At Lakeside Medical Center, we understand. Our Pediatric Department provides family-centered care. We encourage parent participation and decision-making in the care of their children. Our staff is trained to address the medical, emotional and developmental needs of children.

We allow one parent to stay overnight in the room with their child. While our patients may be little, their hearts are big. That is why we make sure that the care they receive is the highest quality. Our team is recognized for their compassion, dedication and commitment. After all, we are amazing together!
