Student Chronic Conditions Planning

Chronic Conditions Planning

Parent/Guardian Instructions

If your child has a chronic health condition and may need assistance while in school, reach out to your School Health team at your child's school. Our team is trained to address and support a variety of medical

conditions during the school day.

Some examples include:

- Diabetes
- Allergies
- Asthma
- Seizures
- Cystic Fibrosis
- Gastrointestinal conditions

With the authorization of your child's health care provider, our School Health team will coordinate your child's care while in school. A new Authorization for Medication/Treatment Form, including Diabetes Medical Management Plan (DMMP), is required each school year and for any changes. The form (available in the physician's office) must be completed and signed by the prescribing physician for each medication and/or treatment. The form must also have the parent's/guardian's signature in order for the medication and/or treatment to be administered.
